UNION COLLEGE

Location

BARBOURVILLE, KENTUCKY, is the site of this institution, and is the county seat of Knox County. It is an incorporated city of about two thousand inhabitants and is situated on the Cumberland Valley Division of the Louisville & Nashville Railroad. It is an attractive and progressive town. It has many of the modern conveniences, such as natural gas, electric lights, waterworks, telephone exchange, good hotels, banks, stores, etc. Its citizenship is refined and law-abiding. In no place in the county is the sale of intoxicating liquors authorized by law. The moral tone of the town is high. The Baptists, Presbyterians, Christians, Methodist Episcopal South, and Methodist Episcopal have churches here. There are no temptations to lead the student away from his or her work; no allurements to vitiate or distract the mind; no empty, profitless amusements; no incentive to idleness or extravagance. The ideals of the people are elevating, their friendships warm, genuine and abiding; their hospitalities cordial and gracious. They are interested in the school and the student. The artificial and the superficial are alien here.

Cumberland River, famed for the purity of its mountain waters and the unique and pleasing picturesqueness of its surrounding scenery, flows through the valley and skirts the town. Charm and beauty of hill and valley here commingle in plentiful and splendid profusion. The chaste and comforting influences of mountain and lowland are present to energize the manly and womanly thought and inspiration of the student. The freshness and freedom of the country life, the helpful influences of a cultured and progressive town, the close and enriching

mingling with these by the student, manifest the many advantages of this seat of learning. The nearby hills, with their rich and ever changing scenery, afford ample opportunity for pedestrian tours and excursions of scientific classes. The climate is mild. No better place in the Commonwealth could have been selected for the school. And here, removed from the fads and extravagances of the times, the student in Union College can not fail to feel that restraining influence that comes of a sense of personal responsibility, and hence a laudable ambition to succeed.

Here he learns habits of industry and economy. So, indeed the opportunity which Union College affords should make a strong appeal to the parent or guardian contemplating placing a child or ward in school.

History

Union College had its origin in the minds of the citizens of Barbourville. They early recognized the need of a Christian institution of learning in their midst. But to turn the furrow one must have a plow. So in 1880, a joint stock company having been formed for the purpose and incorporated, a site secured, and a suitable building erected thereon and dedicated, Union College started on a career of usefulness which has blessed the community and justified the faith of its founders.

In 1886 the property was sold to the Kentucky Conference of the Methodist Episcopal Church. The institution was, from that time until his death, in January, 1897, under the administration of the Rev. Daniel Stevenson, D. D., an able and conscientious educator, a consecrated and devout Christian, a cultured and refined gentleman. His incumbency was a material, intellectual and spiritual blessing to school and student, citizen and community. Upon the death of Dr. Stevenson the Rev. Jas. P. Faulkner, A. M., a native of the county and a graduate of this school, succeeded to the Presidency of the College. A wise and progressive leadership under his administration brought

Mrs. Fanny Speed

the school on towards the accomplishment of its purposes and the realization of its high mission.

During the administration of President Faulkner, the Board of Education came into possession of the legacy bequeathed by Mrs. Fanny Speed and from that time the expansion of the school became more marked. During this administration there were planned and begun Fanny Speed Hall and the Central Power and Heating Plant. They were not available for use, however, until the beginning of the next administration, that of Rev. James W. Easley, B. D., A. M., whose term of office began in 1905. In spite of adversities, the school increased in equipment and influence during his administration. During the Summer of 1906, the Administration Building was struck by lightning and burned to the ground. One year later it was replaced by a much more commodious building and the Boys' Dormitory was added.

Upon the resignation of President Easley in 1910, Judge James D. Black, LL. D., of Barbourville, Kentucky, became the fourth President of Union College. Under his management the material, as well as the less tangible, interests of the school progressed with rapid strides. The two years of President Black's connection with the school will be remembered as years of solid growth.

On his retirement from the leadership of the school its management was given into the hands of Percy L. Ports. Prof. Ports had been in the service of Union College for seven years, having held the position of teacher of Natural Sciences for that period, and having been Vice-President for two years. He is a graduate of Ohio Wesleyan University.

During the school year of 1912-13 the Board of Education suffered such severe financial reverses that it appeared for a time that it would be necessary to close the school for a term of years. Fortunately, this calamity was averted, largely by the loyalty and sacrifice of the citizens of Barbourville. A large part of the sum necessary for the operation of the school was subscribed and a group of twenty-six men bound themselves by

Group of Girls and Teachers of Fanny Speed Hall

contract to guarantee the continuance of the work of the institution. As a result of this emergency the Local Board of Trustees came into existence. This Board will have the direct oversight of the school and will co-operate with the Board of Education in the control thereof.

Aim

Life is a warfare. Then, shall we not be armed? In this warfare, education is the sword, character the protecting aegis. To vitalize the power of intellectual development; to impart religious instruction; to surround with refining influences; to appeal to the sense of right, the pride of manhood and womanhood; to enlarge the innate love of the Good, the True, and the Beautiful; to inculcate lofty moral and social ideals; to teach and form studious habits,—these are the functions of the College, and therein does it secure the harmonious developments of the faculties and prepare for the largest usefulness in life.

But education is a process, however, rather than a fulfillment; an acquiring, rather than a completion. The school, then, can assist in the buckling on of the armor, but it may not make one fight. The well-poised school will teach faith in oneself, the value of self-reliance, the dignity and ennoblement with which honest effort requites the worker. This, Union College endeavors to accomplish. And if it can teach the sons and daughters of its patrons to be "of quick perceptions, broad sympathies, and wide affinities; responsive, but independent; self-reliant, but deferential; loving truth and candor, but also moderation and proportion; courageous, but gentle; not finished, but perfecting," its mission will not have been a failure. Its method proceeds on the thought that morality in the best sense can be taught only through the inculcation of high ideals constantly kept before the mind of the student. Appeal is made to pride of honor in the student.

The fact that Union College is under the control of the Kentucky Conference of the Methodist Episcopal Church does not mean that the school undertakes to teach any particular system

of theology, or to inculcate sectarian doctrine. But the fact is a guaranty that the institution rests on a broad Christian foundation, thus providing a distinctly Christian education. Its aim is to place around the student those helpful, lasting influences that stand for the best culture of young men and women and give the best promise of the happiness of the family and welfare of the community. Mere secular learning may not vouchsafe these, and an education which does not give emphasis to ethical principles and Christian aspiration and conduct, can, it may be, enlighten but may not ennoble. There is wisdom, then, we think, in that supervision of the school life which comes from religious sources.

The aim, then, of Union College is the development of life and formation of the genuine substantial character. It interprets the meaning of life and sets itself to the task of fitting young men and women for the manifold and responsible duties the age demands.

Grounds, Buildings and Equipment

The campus is the most beautiful plot in town. It contains several acres, and on it are the splendid buildings here mentioned:

ADMINISTRATION BUILDING.—This is a magnificent and spacious three-story building, constructed of brick and concrete, and trimmed with Tennessee marble. The building is steam-heated, and lighted by electricity, as are all the buildings on the campus, and is scientifically ventilated to insure plenty of good fresh air. In it are the classrooms, the Library, the President's office, the chapel, and laboratories. The classrooms are fifteen in number. Each is equipped with single desks and slate blackboards of ample size. From the President's office are speaking tubes to each room, and also electrical connections so that a modern program clock situated in the office rings automatically in each room the bells for the change of classes and other signals. The chapel is commodious and is seated with comfortable

opera chairs. There are three laboratories—Chemical, Physical, and Biological. These are equipped throughout with modern apparatus and enable the student to do unusually thorough work in Science.

FANNY SPEED HALL.—This is the home of young women. It is a three-story building of unique design. It has spacious halls and parlors, and the rooms are nicely furnished. The building is supplied with bathrooms, toilets, and with gas hot plates for students' use. A small monthly fee is charged for this latter convenience.

YOUNG MEN'S HALL.—This is a fine brick structure of colonial design, three stories high. It has a large number of rooms, accommodating two students each. Nothing is lacking for convenience, comfort, or health. This is on the opposite side of the Campus from Fanny Speed Hall. The furniture is equal to the best in use among boarding schools. This building is fitted with toilet rooms, and ample baths with cold and hot water.

STEVENSON COTTAGE.—This building bears the name of the honored first President of Union College. It is used as a dwelling and is occupied by the Superintendent of Buildings and Grounds.

DINING HALL.—One central dining hall is made to render service for all students. The dining hall will accommodate three hundred persons. The students are not isolated, but are part of a large family. The most of the Faculty are together with the students in the dining-hall. The food is ample and of reasonable variety. Nothing is so necessary to good health as food of good quality properly prepared. The healthy appearance of our students is a testimony to our dining-hall. The institution has its own private bakery to insure wholesome bread.

HEAT, LIGHT AND POWER PLANT.—This is situated a safe distance from the other buildings and contains the boiler, engine, dynamo, and pumps. The location of this plant, together with the concrete and brick construction of the College buildings, places danger of fire as the remotest possibility. From this plant all the buildings are supplied with steam heat, electric

Physical Laboratory

lighting, and water. Its capacity and efficiency are such that the buildings may be kept at the most comfortable temperature even in the severest winter weather. In addition to lighting the buildings, this plant lights the Campus by means of large arc lights so located as to give it a beautiful appearance at night. Within this building are two drilled wells from which the buildings and Campus are supplied with water. The College has its own sewerage system leading to the Cumberland River, thus insuring proper sanitary conditions.

To sum up, the equipment of Union College is modern and complete. Convenience, sanitation, and efficiency are secured, so that the student may always be at his best for school work.

Social Life

Due consideration, under proper supervision of the Faculty, is given to the developing social nature of the young people. Indiscriminate mixing of the sexes is not permitted, but frequent social gatherings by permission of the Faculty, and under the direction of the Preceptress, are held. These give the student the culture that is demanded today of educated men and women. Our ideal is the home life of a well-ordered Christian home.

Government

Proper control and guidance of a student body are of such great importance that too much attention cannot be given to them. The principle is *self-control* and *self-direction*. The principle of developing the good is adopted. This produces the best results in character building. Those who are not amenable to rules of right living and do not respond to the appeals to a moral life, or who waste the time in idleness, will be asked to leave.

Dormitory life places the control of the student body at best advantage for easy direction in conduct as well as best direction in study. Co-operation from the homes of the students is a necessity. This is expected, and earnestly solicited.

Chemical Laboratory

The dormitory student is required to keep his room and its contents in good condition. The room and contents are subject to inspection by the Faculty at any time.

A student who fails to make a passing grade in his work may be sent home or placed in a lower grade, within the discretion of the Faculty. If such failure should be considered the result of a lack of application, the student may be sent home; if for a lack of ability, he shall be put in a lower grade.

Erratic course work is not allowed. Students must select and pursue a consistent course.

A study hall is provided, with attendance thereupon compulsory for all students between recitations. An instructor is present to preserve order and render such assistance with studies as is necessary. Those students who do not study properly or who are not observant of the regulations for study hour, from 7:00 to 9:30 P. M., will be required to attend the common study hall, presided over by a member of the Faculty.

Church Attendance

Each student is expected to select one of the churches of the town as a Church home, and is required to be in attendance at church during the Sabbath morning service. It is also expected that each student shall give attendance upon all religious services held under the direction of the College. The attendance at daily chapel service is required.

SCHOOL FEATURES

The Student Prayer Meeting

For a short time each Wednesday evening the entire student body and members of the Faculty assemble in the College Chapel for prayer service. This service is led by a member of the Faculty.

Lectures

Opportunity is frequently given for the treatment at length of topics by lectures. Members of the Faculty and professional men of the community, and frequently those from a distance, deliver addresses or lectures upon selected subjects.

Literary Societies

There are two of these: Philonikean, and the Fanny Speed, the latter for young women, the former for young men. The importance of these is great in the development of self-control and poise before an assembly. The art of debating, the habit of free discussion, and familiarity with parliamentary laws are cultivated in the regular work. Public meetings and joint session are held, subject to the approval of the Faculty.

Y. M. C. A.

This organization has had a continuous growth and exerts a beneficial influence upon the life of the young men of the school. Sympathetic aid is given by members of the Faculty, besides frequent visits from officers of the state organization. Weekly devotional meetings are held. Bible and Mission Study courses are pursued.

Y. W. C. A.

This organization is well supported and it is felt that the religious life of the young ladies is greatly enriched by its

activities. A Mission study class is maintained, and delegates are sent to the state conferences.

Athletic Association

This organization has charge of the games and field sports of the school. The mild climate, late and dry falls, and early spring make field sports a greater feature here than in many other localities. The Association has under its management baseball, basketball and tennis. In baseball both a first and second team are maintained. Basketball and lawn tennis are participated in by both the young men and the young women on separate grounds.

In order to engage in interscholastic games the student must keep his work satisfactory. To do this his work must average at least seventy-five per cent, with no study below seventy. Athletics is maintained, primarily, for physical development and outdoor recreation, that study and mental work may be the more relished. The admission of young women to broader fields of activity makes it necessary that their physical training be not neglected in their course of preparation.

Library and Reading Room

The Speed-Stevenson Library was established by Mrs. Fanny Speed, of Louisville, Kentucky, and Mrs. Stevenson, wife of the first President of Union College. The late Professor George H. Daines was a liberal contributor to it. A large number of books was contributed by Drew Theological Seminary, through the kindness of Rev. S. G. Ayers, Librarian. Numerous reference books for the various departments are added each year. The reading room is supplied with many of the best secular and religious papers and American magazines. All students are thus able to keep themselves informed with respect to the daily news and to familiarize themselves with the best current literature.

The Honorable John H. Wilson, of Barbourville, Kentucky, generously donated to Union College, a large number of books.

Chapel

These books embrace a wide range of useful information and constitute a valuable addition to the library.

A Conference Alcove has been founded and is maintained by the individuals of the Kentucky M. E. Conference. Its aim is to supply complete sets of the works of classic writers.

Donation

Recognizing the great power for good in the Christian ministry, the Reverend Joshua S. Taylor, of Middleburg, Ky., on June 16, 1910, and consistent with his splendid life of service and usefulness, donated to Union College a sum of money, the interest on which to be devoted to the aid of men studying for the ministry in the Methodist Episcopal Church. He has directed that the principal be invested, remain a permanent fund, and only that which it yields be used, and then as here stated. We have suggested that this gift be known and designated as "The Joshua S. Taylor Fund," indulging the fond hope that others, seeing the high purpose for which it is to be devoted, will augment it to the extent of making this fund capable of immense good.

ACADEMIC DEPARTMENT

In the Academic Department three courses are offered: Classical and Scientific Academic Courses, and College Preparatory. For the satisfactory completion of either of the Academic Courses a diploma is awarded; for the College Preparatory Course a certificate of work done is issued. The Classical and Scientific courses each offer sixteen units of college entrance requirements. For the College Preparatory Course the student may select such studies as are required by the college he anticipates entering. Our Academic Department is in class A of the accredited list of the Association of Kentucky Colleges, which means that our graduates receive full Freshman rank, without examination, at any college belonging to this Association.

COURSES OF STUDY

(Unless otherwise specified each subject is five periods, 45 minutes, per week and constitutes one unit.)

Classical Course

FIRST YEAR

English I.	Algebra.
Ancient History.	Beginning Latin.
Bible (1 hour).	

SECOND YEAR

English II.	Algebra ($\frac{1}{2}$ unit).
Mediaeval and Modern History.	Caesar.
	Bible, 1 hour.
Botany ($\frac{1}{2}$ unit) elective.	

THIRD YEAR

English III.	Plane Geometry.
German I.	Cicero.
Physiology ($\frac{1}{2}$ unit).	Bible, 1 hour.

FOURTH YEAR

English IV.	Physics.
German II.	Virgil.
Bible, 1 hour.	

Scientific Course

FIRST YEAR

English I.	Algebra.
Ancient History.	Beginning Latin.
Bible, 1 hour.	

SECOND YEAR

English II.	Algebra ($\frac{1}{2}$ unit).
Mediaeval and Modern History.	Caesar.
Botany ($\frac{1}{2}$ unit).	Bible, 1 hour.

THIRD YEAR

English III.	Plane Geometry.
German I.	Zoology ($\frac{1}{2}$ unit).
Physiology ($\frac{1}{2}$ unit).	Bible, 1 hour.

FOURTH YEAR

English IV.	Solid Geometry ($\frac{1}{2}$ unit).
German II.	Physics.
Physiography ($\frac{1}{2}$ unit).	Bible, 1 hour.

Bible

REV. OVERLEY.

The study of the Bible will be given its proper place. A four years' graded course has been prepared. The Freshman class will study the Bible as a whole, using *Hurlbut's Teacher-Training Lessons* as the text. The three higher grades will make more detailed studies of certain selected sections of the Bible. Maps and charts will be used. This is required of all Academic students.

College Power House

English

MISS WEEKS.

The Department of English aims, first, to train its pupils to think clearly and independently; second, to speak and write simple, clear, idiomatic English; third, to make the pupils acquainted with some of the masterpieces of English literature, and to train them to understand and to love good literature wherever found.

ENGLISH I.—This course aims, first, to drill the student in the essentials of English construction, not in its technicalities; second, to give him much practice in applying the essential principles of English Grammar to the expression of his own thought and feeling. Composition work, and training in both oral and written expression is required throughout the year. In addition to their class work, the pupils are required to read selections from easy literature. Text-book, *Book II, Mother Tongue*.

ENGLISH II.—English II reviews the constructions of the eight parts of speech; much time is devoted to syntax and synonyms. Compositions are required frequently; these are based on the required readings and the student's own experience. Six classics are studied during the year. *Hill's Beginnings of Rhetoric and Composition* is the text-book used.

ENGLISH III.—In the beginning of this year's work Narration, Description and Exposition are studied as a basis of composition work. Most of the time in this course is devoted to the study of the required classics, supplemented by the history of English Literature. *Halleck's History of English Literature* is the text-book used.

ENGLISH IV.—Narration, Description and Exposition are reviewed, and Argumentation with the Elements of Debate is thoroughly studied. The College Entrance requirements for practice constitute the work in literature for this course. One term of collateral reading is required. Composition work, both oral and written is required throughout the year.

Parlor, Fanny Speed Hall
Corridor, Fanny Speed Hall

Room in Fanny Speed Hall
Girls' Basket Ball Field

History

MISS WEEKS.

ANCIENT HISTORY.—The development of our modern civilization as traced through the events of history will constitute the main theme of our two years of historical study. Text, *Myer's Ancient History*.

MEDIAEVAL AND MODERN HISTORY.—This is a continuation of the first year's work and completes the survey of the development of human institutions to their present stage. Text *Myer's Mediaeval and Modern History*.

German

PROFESSOR RICKETTS.

GERMAN I.—A foundation is laid for a conversational knowledge of the language. Easy German classics are read and conversation, based on the reading, is required. Texts, *Spanhoofd's Lehrbuch der Deutschen Sprache*, *Im Vaterland* and *Immensee*.

GERMAN II.—More attention is paid to composition and conversation, and more difficult classics are read. The classics given below may be varied to suit the needs of the class. Texts, *Pope's German Composition*, *Mosher's Willkommen in Deutschland*, *Schiller's Wilhelm Tell*, *Goethe's Hermann und Dorothea*.

Mathematics

PROFESSOR PORTS.

The aim of the courses in Mathematics is primarily mental discipline and development of accurate conception of space and form. It is desired to make the student familiar with the principles that are applicable to practical problems and to instil the spirit of original work.

ALGEBRA (begun).—The four fundamental operations, factoring, fractions, simple and complex, simple equations, and simple simultaneous equations are covered, as well as the statement of problems by means of equations. Text, *Milne's Standard Algebra*.

ALGEBRA (completed).—This includes involution, evolution, theory of exponents, radicals, quadratic equations, and problems solvable by aid of quadratic equations, graphs, ratio and proportion, progressions, and binomial theorem. Text, *Milne's Standard Algebra*.

Latin

PROFESSOR RICKETTS.

BEGINNING LATIN.—A clear, systematic and interesting presentation of the fundamentals of the Latin language is the aim of this course. Text, *D'Ooge's Latin for Beginners*.

CAESAR.—The first four books of Caesar are read, and special attention is given to a review of the principles of Latin Grammar. Text, *Bennett's Caesar*, *Bennett's Latin Grammar*, and *Pearson's Prose Composition*.

CICERO.—Six orations of Cicero are read; the four against Catiline, Pro Archia, and Marcellus. Texts, *Bennett's Cicero*, *Bennett's Grammar*, and *Pearson's Prose Composition*.

VERGIL.—The first six books of the Aeneid are studied. Special attention is given to Prosody. Together with this, Mythology is studied. Texts, *Bennett's Vergil* and *Grammar*.

ple simultaneous equations are covered, as well as the state-
 ment of problems by means of equations. Text, *Milne's Stand-
 ard Algebra*.

ALGEBRA (completed).—This includes involution, evolution, theory of exponents, radicals, quadratic equations, and problems solvable by aid of quadratic equations, graphs, ratio and proportion, progressions, and binomial theorem. Text, *Milne's Standard Algebra*.

PLANE GEOMETRY.—Much attention is given to the solution of original problems, in order to train the student in logical habits of thinking and to discourage the memorizing of propositions. Text, *Wentworth's Plane Geometry*.

SOLID GEOMETRY.—The practical application of principles learned is emphasized in this branch of Mathematics as well as in the others. Thorough drill is continued. Text, *Wentworth's Solid Geometry*.

Natural Sciences

PROFESSOR PORTS.

The sciences are taught mainly on the laboratory basis. This is in line with modern teaching methods, and is made possible by our excellent laboratory equipment. The student is taught habits of observation and of accurate thinking. The sciences are taught as explanations, on a scientific basis, of life and nature about the student; hence, field work is given a large place. Each course is somewhat evenly divided between recitation work and laboratory or field work. Two periods of laboratory work are the equivalent of one of recitation work.

BOTANY.—This course consists of studies in elementary Botany, presented with special reference to the relation of the plant to its surroundings. Plants will be studied from this viewpoint during our botanical excursions. The development of the plant from the seed will be studied in the field and in the laboratory. The lower plant forms, such as bacteria, molds, algae, etc., receive due consideration. The course is supplemented by illustrated lectures, using both lantern and microscope slides. Text, *Andrew's Practical Botany*. (Not offered in 1913-14.)

ZOOLOGY.—First Semester. Type animals, such as sea anemone, starfish, earthworm, crawfish, frog, etc., are studied

by laboratory dissection. Many subjects are illustrated by lantern slides. Theoretical questions are fully discussed. Birds and other animals are studied in their relation to agriculture. Collections of specimens, especially insects, are made and classified by the students. Text, *Davison's Practical Zoology*. (Alternates with Physiography.)

PHYSIOLOGY.—Second semester. This is a course in Human Physiology, Personal Hygiene, and Public Sanitation. Practical matters of health and prevention of disease have an important place in the course. An effort is made to impress the student with the necessity of hygienic living. Our excellent laboratory equipment in this branch adds to the interest and value of the course. It is required in all courses: *Blaisdell's Life and Health* is the text used. Supplementary reading in *Pyle's Personal Hygiene* is required.

PHYSICS.—The importance of the study of Physics, especially by the laboratory method, is now universally recognized. We take care of this course in a thorough manner. In our Physics laboratory, apparatus is provided for about forty individual experiments, covering Mechanics, Light, Heat, Sound, Magnetism, and Electricity. Besides these individual experiments, many demonstrations are given by the instructor. Texts, *Hoadley's Elements of Physics*, and *National Physics Note Book*.

PHYSIOGRAPHY.—This is a laboratory and field course in the study of land forms, together with studies in weather conditions. The work follows mainly *Davis's Physical Geography Atlas*.

CHEMISTRY.—This is a thorough course in General Chemistry, in which laboratory work takes an important place. We have a modernly equipped laboratory with running water and natural gas, as well as commodious acid-proof tables for students' use. The course comprises some fifty individual experiments, as well as numerous demonstrations by the instructor. Text, *Brownlee's Chemistry and Manual*. (Not offered in 1913-14.)

NORMAL DEPARTMENT

PROFESSOR B. C. LEWIS.

The public schools of our State are making rapid strides forward. Every year more is required of the public school teacher. It is the purpose of this department to keep abreast of the times educationally and to prepare the teachers to do their most efficient work and to command the highest wages. Those not teaching may enter for Normal work in the Fall. Classes will then be organized in the common school branches. It is also desired to have classes in such professional subjects as the History and Science of Education and Psychology and Method.

At the opening in January classes will be organized in all the common branches, with the intention of continuing each class for the entire remainder of the school year. This will enable teachers and students to select and pursue the subjects in which they feel most deficient. Such instruction will be given in Psychology and Theory and Practice as will meet the needs of the teachers.

Equipment has been added for textbook and experimental work in Agriculture.

Many Normal students often desire to take some higher work. For the benefit of these and others, new classes will be organized in beginning Latin and Algebra. Any desiring still higher work can find suitable classes to which they can easily adjust themselves. Literature and other work necessary to prepare for the examination for State Certificate will also be given.

The textbooks in the common branches will mostly be those adopted by the State Board. For advanced work Milne's Standard Arithmetic will be used. The professional texts will be Seeley's History of Education and Roark's Psychology and Methods.

Grade Work

Students will have to pass creditably in the work of the Eighth grade before they will be permitted to enter the Academic Department. Graduating exercises will be held and diplomas will be awarded upon the completion of this grade. The courses of study are those outlined by the State Department of Education and are uniform with those of our best schools. Below are given the names of the teachers and their work.

Grammar Room, Seventh and Eighth Grades, Prof. Lewis.

Intermediate Room, Fourth, Fifth and Sixth Grades, Marena Sevier.

Primary Room, First, Second and Third Grades, Mary E. Davis.

Normal Department

BUSINESS TRAINING COURSE

To Mr. A. M. Decker, our worthy secretary of the Board of Trustees, much credit is due for the establishment in Barbourville of the Union College Branch of the famous

Business College, of Louisville, Kentucky.

Union College Branch of the Bryant & Stratton Business College will occupy four rooms in the Boys' Dormitory building and will open here on Tuesday, September 2, 1913, under the supervision of Prof. Geo. W. Schwartz, principal, Prof. J. T. Howard, vice-principal, and Miss Nettie M. Creal, lady principal, assisted by Bryant & Stratton trained teachers.

This arrangement whereby the recognized leaders in business training undertake to conduct a regular business college in connection with a literary college, thereby giving literary students an opportunity to train for business pursuits, under such auspicious environments and economical conditions as Union College affords, is without a parallel.

The advantages to the Bryant & Stratton Business College of Louisville and to Union College are mutual. Union College is thereby enabled to offer its patrons the best there is to be had in business training. Bryant & Stratton Business Colleges are the pioneer business training schools of America, and branches are to be found in all large cities. A Bryant & Stratton diploma is an introduction in all parts of the world.

On the other hand, Bryant & Stratton Business College has for some time past recognized the value of just such advantages as Union College, under this arrangement, gives to its students. Board, room, heat and light at \$9.45 per month in a modern, sanitary, steam heated, electric lighted dormitory is nowhere else available to business college students.

Bryant & Stratton training is of such high order that this famous school for many years past has guaranteed positions (in writing) to all its graduates. The employment department of Bryant & Stratton Business College is located at Louisville, Kentucky. Last year it had calls for over five times as many graduates as it could supply. The services of this department are open to all graduates of the school, whether they attend the Union College or any of its other branches.

The instruction in the Union College, as well as in all the other branches, is of the same high order as in the Louisville school, the chief difference being that for obvious reasons the model office and employment department are located in Louisville, which is the recognized commercial center of Kentucky, and perhaps of the entire South, and most naturally that is where the business men of the South and West look for their office help. The school is open to both ladies and gentlemen.

Prospective students wishing to take the business training course, which includes bookkeeping, penmanship, rapid calculations, business correspondence, business forms, billing, shorthand, typewriting, etc., etc., or a selection of studies, should ask for Year Book.

Address

A large, elegant handwritten signature in cursive script that reads "D. W. Schwartz". The signature is written in dark ink and features elaborate flourishes, particularly at the beginning and end.

Principal, or

A large, elegant handwritten signature in cursive script that reads "J. P. Howard, Jr.". The signature is written in dark ink and features elaborate flourishes, particularly at the beginning and end.

WORK IN PHYSICS

DEPARTMENT OF MUSIC

The demand for more and better music increases year by year. Today, it is not only sought for in refined and cultured circles, but it is demanded in all forms of church and school work, and no student's education is complete without some knowledge of music.

The courses of study here prescribed are for earnest students who want to attain real excellence, and as very many have in mind the work of teaching, their needs have been especially provided for. A careful study of the individual requirements and capabilities of each pupil is made, a thorough training in the fundamental principles of technique is given, and enthusiastic musicians as well as finished artists are developed.

The studies named indicate the range of difficulty belonging to the several grades, but it is obvious that lists of pieces sufficient to illustrate a wide range of musical literature can not here be given.

The time needed for the completion of each grade will average not less than one year. Often more time should be taken, especially if College studies are pursued at the same time.

A musical education should also comprise as much literary work as is now done in high schools, and a College Course is recommended to all who can attain it. Herein lies the advantage of studying music where art, literature and science are blended. Here it is taught that music is the peer of any branch of human knowledge, but that no single line of study is sufficient for complete scholarship.

The following is an outline of the Course of Study for the

Pianoforte

First Grade.—After learning the notes, rests, etc., careful attention is given to development of the finger touch and of a round and full legato. Technical studies are given for muscular

Tambourine Drill Mandolin Club Recital
 Recital of Class in Elocution
STUDENT ENTERTAINMENTS

development. The first three major scales and first grade pieces will be studied until the pupil is ready to enter the Preparatory Class.

Second Grade.—This consists of major scales and common chord arpeggios, hands, separate, four notes to a beat, at the metronome rate of 80. Loeschhorn, Op. 65, books 2 and 3; Kohler, Op. 50; Sonatinas by Kuhlman, Dussak, and others. Pieces by Haydn, Schumann, Mozart and modern composers.

Third Grade.—Major scales, both hands together at the metronome rate of 92. Minor scales and common chord arpeggios. Duvenoy; Loeschhorn, Op. 66, selections from Heller, Op. 47; Sonatas of Mozart and Haydn; Field's Nocturnes; Compositions by Gurlitt, Moskowski, Mendelssohn, and others.

Fourth Grade.—Major and Minor scales, hands together, at metronome rate of 100; common chord arpeggios at the rate of 80. Czerny's Velocity Studies, Op. 299; Bach's Little Preludes, et Fugues; Selections from Heller, Op. 46 and 45; Mendelssohn's Songs Without Words; Sonatas by Mozart and Beethoven; Selections from Chopin, Schubert, Schumann, and modern composers.

Fifth Grade.—Major and Minor scales, hands together, at metronome rate of 116; common chord arpeggios at rate of 100. Dominant and diminished sevenths at rate of 100. Cramer Etudes; Bach's Inventions; Octave Studies; Schubert's Impromptus; Chopin's Waltzes; Beethoven's Sonatas; Selections from Schumann, Weber, Grieg, MacDowell, and others.

Senior Year.—Pupils must play scales, major and minor, hands together, at metronome rate of 132; arpeggios of major and minor scale chord, dominant and diminished sevenths at rate of 116; major and minor scales in double thirds, chords, and octaves, hands separate, at metronome rate of 80. Clementi's *Grado ad Parnassus*; Bach's *Well-tempered Clavichord*; Selections from Handel's Suites; Bach's English and French Suites; Beethoven's Variations; Mendelssohn's Scherzos; Chopin's *Polonaises* and Nocturnes; Modern Composers. Students in this grade should practice at least three hours a day. Before com-

Mandolin Club

pleting the course in music, pupils must pass a creditable examination in Practical Harmony and Theory, and have at least one year in History of Music.

Recitals are given each quarter, all students of the Music Department participating, at the discretion of their instructors.

Violin

WILLIAM M. BAKER.

The violin is the nearest approach to the human voice of all the musical instruments. Its music is an endless source of delight. It is splendid for solo work and for accompanying voices in singing. For the cultivation of a fine musical ear there is nothing superior to the study of violin. We offer a carefully graded course, covering at least three years' work. An orchestra will be maintained in which the student will have the opportunity of studying ensemble playing to supplement his individual work.

MUSICAL ORGANIZATIONS

Orchestra

WM. M. BAKER.

This organization is maintained for the training that it gives the students in music, and for the pleasure that such an organization gives the school and its patrons. An orchestra is always in demand to add to the delight of an evening's program. The College owns a few of the foundation instruments for this organization.

College Chorus

MARGARET LOVELACE.

This is the organized class in Chorus Work, and should prove a helpful and delightful addition to the musical features of the school.

Band

WM. M. BAKER.

A good band is well recognized as an important adjunct to a school. Believing this, the school purchased a complete set of Conn Band Instruments, fourteen in number. This assures the permanency of this organization.

Mandolin Club

This, too, is placed upon a permanent basis, the the College owns a set of nine mandolins and one mandola, for the use of the Club. This organization is for young ladies, and is open to any young lady of the school until the instruments are all taken up.

DEPARTMENT OF EXPRESSION

The work in this department consists of two individual lessons per week. The object of the course is to train the body and the voice. Exercises are given to develop body poise and bearing, freedom of gesture, ease of manner, proper articulation, and self-confidence on the platform. Readings, recitations, and impersonations are given by the student. Special attention is given to breathing and the clear, direct expression of the thought.

It is impossible to give a clear outline of the course of study for the year, as each student will be encouraged to develop his own personality in his reading and impersonating, care being taken not to allow the student to fall into conversationalities and mannerisms, so common among students of expression. During the course of the year a number of recitals will be given, in order that the student may apply the theory of the classroom.

Honor Medal

Through the generosity of J. M. Robsion, Esq., of Barbourville, Ky., there is annually offered by him a gold medal to the student of Union College excelling in oratory.

Art

MISS SWEARINGEN.

The different branches of Art are taught:
Freehand drawing from objects, casts and life;
Out-door sketching and study of Perspective;
Crayon;
Pen and Ink;
Water Color;

The Band

Pastel;

Oil;

Pierced Brass;

Clay Modeling;

Stenciling;

Study of Principles of Design and History of Art.

For those not wishing to take individual work, a class, which will meet two hours each week, will be organized for the purpose of teaching the fundamental principles of Freehand Drawing from objects and casts. There will also be a life class free to all art students. Certain hours in the week are to be set apart for an out-door sketching class.

The aim of this department is to ground the pupil in the fundamental principles of Art and to cultivate some of the high faculties of the mind. As to other benefits from a mastery of this course, it need only be said that a knowledge of drawing is now indispensable in many departments of mechanics, and that knowledge of both drawing and painting, besides being a profitable source of income, is also an infinite source of refined and refining pleasure and a means of making cheerful and attractive homes, otherwise often gloomy and bare.

SPECIAL INFORMATION

Advice to Parents

1. It is of the greatest importance that the student be here on the first day of the term.

2. The young ladies' attire should be neat and simple, not elaborate or expensive. The only uniform required is the College cap which is purchased after coming to school.

3. Young ladies residing in Fanny Speed Hall are not permitted to receive attentions from young men, except by written request from the parents addressed to the President. In all cases the administration reserves the privilege of final decision.

4. No parent should undertake to grant to the student with us any permission which might interfere with the school duties of the student, but should concede to the administration the right of control while in school.

5. Parents are requested freely and fully to apprise some member of the faculty, in advance, of the habits and temperament of the student, to the end that all may strive to subserve the best interests of the student. The parent is requested, in case there is felt to exist any cause for complaint, to make known the criticism directly to some member of the Faculty.

Furnishings for Rooms

Most of the rooms are intended for two occupants. If any rooms are unengaged at the opening of the Fall term, they may be occupied by one person on payment of an extra sum.

Students are required to provide themselves with the following articles: large pillow slips, sheets, pair of blankets, comfortable, white spread, towels, napkins, cover for bureau and washstand.

The young men will provide for single beds. There are a few double beds for young ladies. Young ladies will also bring sash curtains forty-five inches in height.

Expenses

The charges are given below for the year, thirty-six weeks. All fees are payable by the term, in advance. When as many as three students from the same family attend a reduction of ten per cent will be made on the tuition.

Good board and lodging can be obtained in respectable families for \$2.50 to \$3.00 a week. Cottages and suitable rooms can usually be rented at reasonable rates where groups of students may board themselves.

When a student enters school it is understood that he enters for at least a full term. All of our charges are made on this basis. It is hoped that no parent or student will plan for less than this. If a student withdraws before the end of the term for any other reason than sickness, a higher rate must be charged for the time he was in attendance. Any payment of board in advance beyond the time of leaving will be returned, subject to above conditions. The student is held responsible for any damage to his room or other property.

ROLL OF ALUMNI OF UNION COLLEGE

1893

- James P. Faulkner, A. B., M. A.....Berea, Ky.
 In charge of U. S. Tuberculosis Exhibit Car.
 John Elbert Thomas, A. B.....Cincinnati, O.
 Pastor Columbia M. E. Church.

1894

- John Henry Byrley, A. B.....Atlanta, Ga.
 Insurance Agent.
 Charles Helder Gibson, A. B.....Barbourville, Ky.
 Commercial Traveler.
 James Samuel Lock, A. B., M. D.....Barbourville, Ky.
 With Rockefeller Sanitary Commission.

1895

- Alexander Francis Felts, A. B.....Augusta, Ky.
 Pastor M. E. Church.
 Leslie Hudson, A. B.
 Deceased.
 Sarah Elizabeth Lock, A. B.....Kansas City, Mo.
 (Mrs. Geo. Wilson.)
 Daisy Chastine Tinsley, A. B.....Atlanta, Ga.
 (Mrs. Dr. Catron.)
 Maude Ellen Tinsley, A. B.....Cattlettsburg, Ky.
 (Mrs. Harry Marcum.)
 George Harmon Wilson.....110 W. 36th St., Kansas City, Mo.
 Attorney-at-Law.

1896

- William Carson Black, A. B., M. D.....Barbourville, Ky.
 Mine Operator.
 James Pogue Gibson, A. B.....Barbourville, Ky.
 Commercial Traveler.
 George Edwin Hancock.
 Deceased.
 Edward Warren Tinsley, A. B.....4624 Lake Ave., Chicago, Ill.
 Life Insurance.

Ladies' Basket Ball Team

1897

- Fred Trigg Kelley, A. B.....Louisville, Ky.
Pastor M. E. Church, Wesley Chapel.
May E. Lock, A. B.....Atlanta, Ga.
(Mrs. J. H. Byrley.)

1898

- Victor Vance Anderson, A. B.....Cambridge, Mass.
Student in Harvard Medical School.

1899

- John Black Hudson, A. B.....Victoria, Texas
Pastor First Presbyterian Church.
John Eve Matthews, A. B. 1607 Mt. Vernon Ave., Philadelphia, Pa.
Mechanical Engineer.

1900

- Della Jewell Johnson, A. B.....Covington, Ky.
(Mrs. Dr. Rankin.)
Mayme Hanna Johnson, A. B.....Pineville, Ky.
Principal Johnson Seminary.
Henry Clay Black, A. B.....Johnson City, Tenn.
Vice-President City National Bank.
G. A. Lock, A. B.....604 Haston St., Kansas City, Mo.
Insurance.

1901

- U. S. G. Perkins, A. B.....Vassar, Mich.
Pastor M. E. Church
J. Will Harris, A. B., Ph. D.....Greencastle, Ind.
Prof. Psychology, DePauw University.

1902

(No graduates.)

1903

- Margaret Gill Burnside.....Barbourville, Ky.
(Mrs. Margaret Burnside Byrley.)

1904

- Roxye Leona Wilson, A. B.....Cincinnati, O.
(Mrs. Podesta.)
